

Dear colleagues,

sequela of distal radius fractures and their associated lesions are not uncommon and still a challenging problem for hand surgeons. During our meeting we want to focus on leveling operations, partial arthrodesis and all kind of salvage procedures.

The different options will be discussed with our experts on the base of live transmitted surgery and face to face discussions.

This is followed by a double workshop on cadavers at the anatomic institut of the University of Tübingen. The first 40 registered participants will be admitted. The course will deal either with open or arthroscopic surgery. Official language is English. We hope to see you in Markgröningen for what is sure to be an exciting and productive symposium.

Regards,

Prof. Dr. Max Haerle
